ABSTRACT

The primary objective of the Three-Year Nor Cal Attrition Study was to demonstrate that community colleges could overcome the "revolving door" problem and help potential dropouts. It was further realized that the rich descriptive data base that Nor Cal had collected could be of use to the entire academic community. Although grand totals for the Nor Cal consortium data by category of response have already been reported, it was decided that a more detailed representation of this data base should be produced and disseminated. The computer printouts for phases 1, 2, and 3 were collected and the data were arranged by college in tables for each of the questions in the original Northern California Junior College Cooperative Study instrument. While all data is available for phases 2 and 3, some of the data for phase 1 has been lost. Although the descriptive data is presented by college, the schools were randomly assigned alphabetic code letters to insure anonymity. Summary tables for the three phases of the Nor Cal Study are presented in separate sections of the report. (Author/AL)

DESCRIPTIVE DATA BASE FOR THE THREE-YEAR
NOR CAL ATTRITION STUDY

Phase 1

While the primary objective of the Three-Year Nor Cal Attrition study was to demonstrate that community colleges could indeed overcome the "revolving door" problem and help potential dropouts, it was further realized that the rich descriptive data base that Nor Cal had collected should be shared with the academic community. While this has been previously done by reporting grand totals for the consortium data by category of response, during Phase 3 it was decided that a more detailed representation of this data base should be produced and disseminated. The computer printouts for Phase 1, Phase 2 and Phase 3 were collected and the data were placed in the tables that follow. While all data was available for Phase 2 and Phase 3, some of the data for Phase 1 had been lost. However, 13 community colleges out of 22 who participated in Phase 1 were able to go back three years, find the computer printout for their college's descriptive data for Phase 1, and mail it to the Project Director for inclusion in the data base that follows. The 13 community colleges were:

American River College
Cabrillo College
Chabot College
City College of San Francisco
College of San Mateo
College of the Sequoias
Diablo Valley College

Merced College
Monterey Peninsula College
Ohlone College
Porterville College
San Jose City College
Yuba College

This list, of course, gives the colleges in alphabetical order. For the 115 pages worth of descriptive data that follows the colleges were scrambled and then assigned an alphabetic letter so as to insure anonymity among colleges. Since only individual college personnel and the Project Director know which college belongs to which letter, anonymity of response by college is protected.

The purpose of the check list below is to measure the different ideas people have about themselves. In responding, please make your judgments on the basis of how each word describes you.

If you feel the underlined word is very closely related to one end of the scale, you should circle a number towards that end of the scale.

If you think neither word really describes you or that you are somewhere in between, circle a number in the middle of the scale.

Be sure to place one—and ONLY one—circle on each scale for every pair of words. Please work rapidly; first impressions are important here.

Thank you for your cooperation.

DESCRIPTIVE DATA BASE FOR THE
THREE YEAR NORCAL ATTRITION STUDY

PHASE II

PROJECT DIRECTOR
NORCAL ATTRITION STUDY
and
REGISTRAR, NAPA COLLEGE

MAY 1972

Napa, California

DESCRIPTIVE DATA BASE FOR THE THREE-YEAR
NOR CAL ATTRITION STUDY

Phase 2

The following data was compiled, as was the data base for Phase 1, from computer printouts of individual college reports. The following colleges participated in giving the Nor Cal questionnaire in Phase 2:

American River College
Butte College
Cabrillo College
Chabot College
City College of San Francisco
College of San Mateo
College of the Sequoias
Contra Costa College
De Anza College
Diablo Valley College
Foothill College
Laney College

Lassen College
Merced College
Merritt College
Monterey Peninsula College
Napa College
Ohlone College
Porterville College
San Joaquin Delta College
San Jose City College
Sierra College
Yuba College

As was previously done, these colleges were scrambled and then assigned a letter. In the Phase 2 Descriptive Base, colleges are indicated by these letters and, again, since only individual college personnel and the Project Director know which college belongs to which letter, individual college anonymity is protected.

NORCAL CO-OPERATIVE RESEARCH PROJECT

INSTRUCTIONS

This questionnaire is being given to entering freshman students in 22 colleges throughout Northern California as a part of a cooperative research project which has been in progress for one year. The questions on the reverse side of this page should take no more than five or six minutes of your time. Please answer every question to the best of your knowledge. If you do not wish to answer a question, skip it and go on to the next one.

We appreciate your help. The results of this study will be used to develop new programs on your campus, and we hope to provide as much information to each college as possible from your responses.

Thank you for taking this extra few minutes of your time.

DIRECTIONS FOR ANSWERING QUESTIONS

Please make heavy marks to indicate your responses to the questions on the reverse side of this page. Read each question carefully, and make the appropriate response in each case: some questions may ask for more than one response.

For marking social security number and college major code, use the form illustrated below. List the numbers down the page, and then mark the spaces corresponding to the numbers. For example, if we were asking for your birth date, the response would be:

DATE OF BIRTH

Show month, day, year in numbers (Always precede unit numbers with zero, 01, 02, 03, etc.)

Example: Sept. 1, 1949 would
be written as follows:
09 01 49 and marked as shown:

0	1	2	3	4	5	6	7	8	9
9	8	7	6	5	4	3	2	1	0
0	1	2	3	4	5	6	7	8	9
1	2	3	4	5	6	7	8	9	0
4	5	6	7	8	9	0	1	2	3
9	8	7	6	5	4	3	2	1	0

Please select your major from this list and enter the code number of your major in the appropriate blanks.

Majors listed represent Associate in Arts or Associate in Science Degree programs (terminal or transfer). In these areas the College offers a sufficient number of courses in the specific field to permit completion of the twenty-unit minimum degree requirement for the major.

If you are planning to transfer to a four-year college in any of the following-listed areas of study, your degree will be Associate in Arts with a major in Liberal Arts. Completion of (a) general education courses required by the four-year college and (b) courses offered in the area of study will usually meet the Liberal Arts major requirement.

900 Apprenticeship - this code number should be used for all apprenticeship majors in any field. Do not use the code number of the specific trade area.

DESCRIPTIVE DATA BASE FOR THE
THREE YEAR NORCAL ATTRITION STUDY

PHASE III

by

DONALD L. KESTER
PROJECT DIRECTOR
NORCAL ATTRITION STUDY
and
REGISTRAR, NAPA COLLEGE

MAY 1972

Napa, California

DESCRIPTIVE DATA BASE FOR THE THREE-YEAR
NOR CAL ATTRITION STUDY

Phase 3

Altogether some twenty-nine (29) community colleges participated in gaining descriptive data via the Nor Cal questionnaire. Twenty-eight (28) of these community colleges are in California; the twenty-ninth, El Camino College, is in Dallas, Texas. Appreciation should be given for those people at:

Barstow College
El Centro College
Fullerton College

Los Angeles Valley College
San Francisco City College
Victor Valley College

for joining in the Descriptive Data Base phase of the Three-Year Nor Cal Attrition Study.

The twenty-nine (29) colleges that participated in the Phase 3 data collection are alphabetized as follows:

American River College
Barstow College
Cabrillo College
Chabot College
City College of San Francisco
College of San Mateo
College of the Sequoias
Contra Costa College
De Anza College
Diablo Valley College
El Centro College
Foothill College
Fullerton College
Los Angeles Valley College
Merced College

Merritt College
Napa College
Ohlone College
Porterville College
Reedley College
Sacramento City College
San Joaquin Delta College
San Jose City College
Santa Barbara City College
Shasta College
Sierra College
Solano College
Victor Valley College
Yuba College

As was previously done in both Phase 1 and Phase 2, these colleges were scrambled and then assigned a letter before being placed in the Phase 3 data base. Individual college anonymity is thus protected.

Barstow College, Victor Valley College, Fullerton College, Los Angeles Valley College, and El Centro College were "new" colleges, in the sense that 1970 was the first time the Nor Cal questionnaire was given to entering freshmen at these colleges. In the future a comparison should be made to determine if the ranges of responses are alike for the "new" group (5) and the "old" group (24). If the ranges overlapped the descriptive aspects of the questionnaire could be seen as applicable not only to Northern California community colleges but to others as well.
